GEOWORKS PRO™

Hello!

Please begin here.

A ROAD MAP TO GUIDE YOU THROUGH INSTALLATION.

A Road Map...

GeoWorks Pro is a combination of two award-winning products, GeoWorks Ensemble and Borland's Quattro Pro SE spreadsheet. Each product has its own manuals and installation disks. This little guide will act as your "road map," showing you what each of the books is for, and how to install both of the products.

First, the books:

GEOWORKS PRO OWNER'S MANUAL is your handy reference guide, and also features a tutorial to help you become familiar with GeoWorks Ensemble. (It *also* has installation instructions—which are basically identical to those included here.)

TROUBLESHOOTING AND CUSTOMER SERVICE guide is where to turn when you have a problem. Here you'll find answers to common questions, as well as information about new additions to the product.

GETTING STARTED WITH AMERICA ONLINE quickly introduces you to the popular America Online information service.

QUATTRO PRO SE manual is the complete reference guide to Borland's Quattro Pro SE spreadsheet. (You should also flip to the "Quattro Pro Viewer" chapter in the GeoWorks Pro Owner's Manual for information about using Quattro Pro with GeoWorks Ensemble.)

THE GEOWORKS PRO REGISTRATION CARD is included separately in the box. Please take a moment to fill it out and drop it in the mail.

QUESTIONS? FOR TECHNICAL SUPPORT ON QUATTRO PRO SE OR OTHER BORLAND PRODUCTS, CALL BORLAND TE

Now, get going!

If you're installing GeoWorks Pro as your first GeoWorks product, just follow the installation instructions here. If GeoWorks Pro is an upgrade to another GeoWorks product, don't worry—the SETUP program safely installs the new version over your old GeoWorks software, updating all of your GeoWorks application and system files while preserving your existing documents. (It also preserves any DOS buttons you've created on the DOS programs screen, though you may find the pictures have changed.)

INSTALLING GEOWORKS PRO ❶ Insert the GeoWorks Pro disk #1 into the A: or B: drive. ❷ At the DOS prompt, type A:SETUP or B:SETUP (as appropriate) and press Return. ❸ Follow the instructions that appear on the screen.

INSTALLING QUATTRO® PRO SE The Quattro Pro SE spreadsheet comes with its own INSTALL program that installs Quattro Pro in its own directory, separate from the GeoWorks directory. ❶ Insert the Quattro Pro SE disk #1 into the A: or B: drive. ❷ At the DOS prompt, type A: or B: (as appropriate) and press Return. ❸ At the DOS prompt, type INSTALL and press Return. ❹ Follow the instructions on the screen. If you're not sure how to answer some of the installation questions, check the handy chart on the back of this sheet for our recommended answers.

RECOMMENDED ANSWERS DURING QUATTRO PRO SE INSTALLATION

Question	Answer
Source Drive	As appropriate
Quattro Pro Directory	C:\QPRO
Monitor Type	As appropriate
Edit AUTOEXEC.BAT	Yes* (*very* important)
Printer Manufacturer	As appropriate
Printer Model	As appropriate
Printer Mode	As appropriate
Graph Quality	Draft
Bitstream Character Set	As appropriate
Fonts to Build	None

*We recommend that you let the INSTALL program add Quattro Pro SE's directory to your path statement. This lets the spreadsheet Viewer easily locate the Quattro Pro SE program for launching.
